Past President, International Society of City and Regional Planners

19:00 hours, **OPENING / COCKTAILS**

7 ARCHITECTS FROM 7 HILLS will present the works of seven contemporary Turkish architects from Istanbul with photos and video presentations. The architects featured in the exhibition represent the leading figures in contemporary architecture in Turkey. While there are many talented architects working in Turkey today, the amount and quality of the work built by these designers set them apart. On the threshold of the third millennium, this group represents a new generation of architects with a commitment to Modernist values but they also aim to acquire their own international attitude.

The accompanying exhibit **IMPRESSIONS** reflects the architecture of industrial buildings in Istanbul through the camera of CEMAL EMDEN, Architect/photo artist.
